

PURE STORAGE Powered Cloud Services

You already know that Lume delivers best in class cloud solutions that meet and exceed the demands of any production or disaster recovery needs. Well, things just got even better.

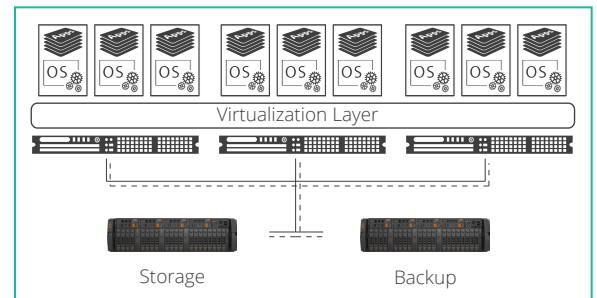

The One-Two Punch

Our partnership with Pure Storage™ allows Lume to provide scalable, enterprise-grade infrastructure with all flash storage - delivering one of a kind performance that will blow you away.

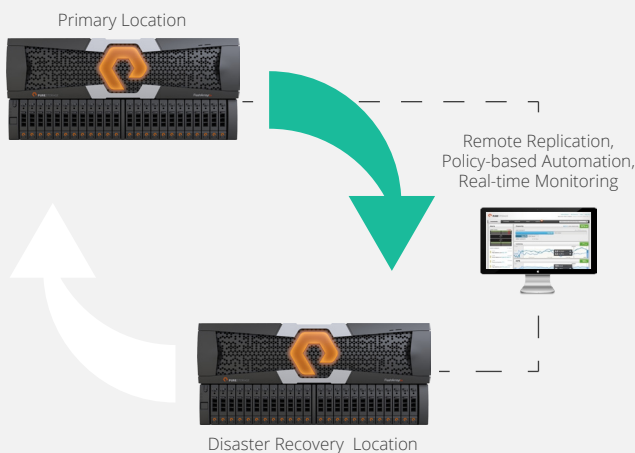

You **can** have it all - speed, performance, security and reliability all on a global network and data center footprint that is backed by the best Customer Service and Technical Support around.

Powerful All SSD Cloud Infrastructure

Production applications and environments demand performance, reliability and scalability. Using Lume's infrastructure solution with all flash storage allows you to employ cloud solutions that are powerful enough to handle the demands of **any** application, while retaining a scalable cost model that allows you to start with what you need and scale as you grow.

All Flash Pure Storage
Managed and hosted on enterprise-grade Lume infrastructure

Offsite Pure-to-Pure Replication

Pure storage arrays make your production applications fast, but what would happen if you have to fail over to a DR or backup location? Can your secondary location handle the load?

Leveraging Pure's FlashRecover Replication and Lume's data center footprint, you now have the ability to replicate a single volume or an entire array to an offsite Pure storage array. You can have confidence knowing that your secondary or DR location is **'ready for prime time'**, while only having to pay for the space you need.

In the event of a disaster, we can replicate your data and have servers standing by ready to be spun up based on your specific Recovery Time Objective (RTO).

Pure Storage Powered Cloud Services

Location Matters

Our data center footprint is designed to provide the utmost flexibility for those with specific location requirements. We will design, build and manage a custom solution that allows you to get **exactly** what you want and host it in the location you need.

Pure Storage Powered Cloud Data Centers

- Los Angeles, CA
- Salt Lake City, UT
- Atlanta, GA
- Northern Virginia/DC, VA
