

The
**Best D*mn
Colocation You
Can Get**

Other provider's upgrades are our standard.

A Better Colo Experience

Let's face it; colocation isn't rocket surgery. Yet other colo providers make it so difficult and overly complicated. It shouldn't be this way. At Lume, we handle everything and make deploying colocation solutions fast and easy.

We Make Colocation Easy

Our team knows everything there is to know about cloud solutions, data centers, and colocation. We've built and operated our own data centers in the past. We are experts in colocation and masters at providing the best customer experience in the industry.

All-Inclusive Colocation Solutions

We go above and beyond. Each solution comes standard with everything you need. There's no nitpicking or nickel and diming you about everything. While we do offer upgrades and additional services, our standard 'out of the box' colocation solution comes with all the bells and whistles.

Bolts, cables, PDUs, and rack diagrams are included at no extra cost.

Why Colocation?

Get Your Servers Out of the Closet

Remove the headaches, noise, and dangers of housing your servers on-site. We provide Colocation services in flexible configurations within secure, industry-leading data centers. Our global footprint of data centers allows you to put your colocation where you need it to be.

Colocation for Growing Businesses

A lot of businesses own the physical hardware necessary to run their core business, but lack the resources to properly power, cool, house, and protect those assets. And why should you? You're not in the data center business – but we are.

Great for Hybrid Solutions

Businesses are becoming more reliant on hybrid IT solutions and often find that mixing cloud and colocation services create an opportunity to streamline integration and improve performance.

You can leverage our experience and expertise to increase your return on investment while reducing your total cost of ownership.

Enterprise-Grade Colocation

- Reduce operating costs
- Improved performance
- Transparent, easy to understand pricing
- Protect your IT investment
- Access to multi-cloud and disaster recovery solutions
- 24/7 support
- Increased security and compliance
- All-inclusive solutions
- Industry experts who will handle everything for you

Location Matters

Edge Data Centers

Location is a crucial component when deploying colocation solutions. Our global footprint of edge data center locations allows you to choose where your environment is located.

The right location can deliver better performance, low latency for your applications, provide compliance with any national or industry regulations for your business, and deliver your content at the edge of the network.

Comprehensive Colocation Solutions

Everything colo has to offer, and more.

Data Center and Infrastructure Experts

We've been doing this for a long time. We know colocation like the back of our hand. You'll get access to our expert staff for 24/7 support, monitoring, and management of your infrastructure.

CYA - Protect Your Infrastructure Investment

Get the most out of our infrastructure and protect your assets. Our colocation solutions provide industry-leading security to protect your infrastructure, giving you peace of mind with a provider you can trust.

Secure, Enterprise-Grade Data Centers

Our service-level agreements include a 100% guarantee for power and network availability. Enterprise-grade and mission critical. SOC, HIPAA, and PCI audited facilities that help you meet and maintain compliance with industry-specific regulations.

All-Inclusive Solutions

Everything You Need Comes Standard

Our colocation solutions come standard with everything you need. No nickel and diming you. Bolts, cables, PDUs, and rack diagrams are included at no extra cost.

- Rack n' stack
- Basic monitoring for your devices
- Visio Diagram of rack layout
- Power analysis of your infrastructure
- Smart/Metered PDUs

Optional Services

Take advantage of additional upgrades and get even more out of your colocation solution.

- Remote hands
- Per outlet monitoring
- Asset management application to track your equipment
- Cloud CTRL™ - Proactive infrastructure monitoring

You Own It. We Watch It. You Sleep.

Security and Compliance

Compliant Colocation

Compliance is a shared responsibility. Our global footprint of edge data centers comply with rigorous standards set by trade groups and certifying organizations that maintain relevant certifications and attestations for our clients.

- 24/7 physical security monitoring
- Surveillance cameras and card readers
- Electronic cabinet access device and user reports
- Independent audit reports and compliant-ready data centers
- Security incident notifications
- Comprehensive compliance assessment and certification list

Cloud and Disaster Recovery

Access to Cloud and DR Solutions

Your business is going to grow, and your needs will evolve. Colocation with Lume allows you to simplify your journey to the cloud. You can work with a single provider to seamlessly deploy workloads across multiple cloud and infrastructure solutions.

As you grow, we can suggest engineering options, upgrades, service changes, Colo-to-Cloud strategies and more.

We offer a comprehensive portfolio of managed cloud, data center, and disaster recovery solutions – so when you're ready, we are too.
