

## Trusted Solution Provider for the Legal Industry

We have been successfully assisting law firms for decades in selecting, implementing, and managing Cloud and Technology solutions. We help bridge the difficult area where your office ends...and the cloud begins.

Our Workspace Anyware™ VDI solutions for law firms can help your firm overcome many of the challenges that are unique to your industry:

- Frequently changing workloads
- Processing and managing large documents
- Securing sensitive and private data
- Accessing case documents and data on the go
- Increasing billable hours and reducing downtime
- Meeting and maintaining compliance requirements

## Secure and Compliant VDI Solutions for Your Firm

Protect your firm against downtime, gain higher levels of security, and reduce risk exposure with VDI solutions that are tailored for legal professionals.

Law firms and legal professionals face very unique challenges. These specific challenges, along with the fact that many law firms and legal professionals have little to no in-house IT staff, makes finding the right solution and right the partner to manage and support these solutions, that much harder.

Our Workspace Anyware™ VDI solutions can meet the needs of your law firm by deploying virtual desktops for your end-users while maintaining control, increasing security, and mitigating risk to your firm.

## Enterprise-Grade End Point Security

No matter what hardware or device the employees are using, data is never stored on any local device. This protects confidential data if a device is ever stolen or lost. Lume provides additional endpoint security measures through a range of enterprise-grade endpoint solutions.

These protect against viruses, malware, and other common threats. Monitoring, backups, and flexible support and management options, add additional protection and peace of mind for your firm's users and devices.

### KEY BENEFITS

#### Mobile and Remote Workers

Law firms can empower and support their mobile, remote, and work from home employees with Lume's Workspace Anyware™ VDI solutions while providing security, control, and access to all sensitive data and applications

#### Easy to Deploy

Lume makes it easy to implement and maintain VDI solutions, no matter how big or small your internal IT resources are

#### Endpoint Security

Removing data off the endpoint provides better security, control, and privacy from theft and malicious users

#### End-User Controls

Limit exactly what employees see, what applications they use, and what actions they can take

#### Compliance

Compliant-ready solutions comply with rigorous standards by trade groups and certifying organizations that maintain all relevant certifications and attestations

#### Performance

Lume's Workspace Anyware™ VDI solutions are built for security, compliance, and performance that provide an unparalleled experience for end-users

## VDI Solutions Designed for Law Firms and Legal Professionals

LAW FIRM CHALLENGES	FEATURE	BENEFIT
<b>Frequently changing workloads</b>	Provision virtual desktops easily, based on workloads as needed	Deploy virtual desktops as needed to support workloads, decommission when projects are done
<b>Supporting remote employees and contract workers</b>	Cloud-deployed virtual desktop environments that are accessible from any device including thin clients, zero clients, tablets, and desktops	Secure connection to controlled devices, data, and apps that is always accessible and available from any location
<b>Large files and data sets management</b>	Pure SSD Enterprise Storage — Lume’s high performance cloud storage solution for virtual desktop environments	Better performance allows employees to quickly and easily work with large documents with less latency
<b>Security for data privacy and sensitive information</b>	Private cloud solutions provide multi-layer security and more control over end users	Keep sensitive data and information secure by removing it from the endpoint and limiting the actions of available for end users to take
<b>Limited IT resources and staff</b>	Solutions with 24/7 infrastructure support and options for Tier 1 and Tier 2 Helpdesk Support	Easy to implement solutions, flexible levels of management and support based on internal IT resources
<b>Meet and maintain compliance requirements</b>	PCI and HIPAA compliant-ready virtual desktop solutions	Ensure that employees and contractors are always working in a secure and compliant environment

## Mobile and Remote Workers

Our VDI solutions allow law firms to support mobile, remote, and work from home employees and contractors with Bring Your Own Device (BYOD) flexibility, while still providing security, control, high-performance, and access to all critical applications and data.

## Unique Challenges for Legal Professionals

Law firms and legal professionals deal with unique and specific challenges that must be considered when implementing any technology solution.

**Billable Hours** - Billable hours are the lifeblood of every firm. Inefficiencies around technology, workflows, and case data management can detract from revenue-generating activities

**Changing Workloads** - Staffing for caseloads and demand can fluctuate, sometimes requiring third-party contractors that don't have the same IT resources to ensure security and best practices are being met

**Remote Workers** - Full-time employees traveling for work, employees working from home, or third-party contractors still need constant, secure access to case documents and sensitive data

**Large Legal Documents and Applications** - Case documents are often large with frequent changes. Firms can lose valuable time transferring, downloading, and managing this data

**Security** - While most industries have security considerations of some kind, it's an even larger consideration for law firms as nearly all data that is handled is confidential and sensitive.

Lume's Workspace Anywhere™ VDI solutions can help law firms and their associates work securely and efficiently within a compliant-ready virtual desktop environment. Our VDI solutions are designed to support remote and mobile workers, as well as third-party contractors, allowing all users to access a secure, compliant, and fast virtual desktop experience from any location on any device.

### Resolution Economics, LLC

"Lume is a true technology partner, and they consistently put their customers' needs and requirements first. Lume has designed and implemented numerous cutting-edge custom solutions such as legal technology solutions, ultra-high speed file transfer technology, and virtual data room to meet our firm's rapidly growing business needs. Lume has exceeded our expectation in their support and services."

- Ed Moon, Partner, Resolution Economics, LLC

## VDI Benefits for the Legal Industry
